EDUCATION

Seattle University

Bachelor of Science in Computer Science and Minor in Mathematics
Merit Scholarship: \$23,500 per annum

Graduated June 2025

Seattle, WA

RELEVANT COURSEWORK

- Machine Learning
- Algorithms Analysis
- Big Data Analytics
- Data Structures
- Mobile Design
- Object-Oriented
- Project Management
- Probability & Statistics

EXPERIENCE

Bilimetrix USA LLC

July 2025 – Present

Web Developer Intern

Seattle, WA

- Redesigned the website layout and added intuitive visuals to improve overall usability and streamline navigation.
- Precisely implemented doctor-specified features to enhance data input accuracy and support clinical workflows.
- Technologies: C#, Asp.Net, Html5, MySQL, Git

F5, Inc

September 2024 – June 2025

Software Engineer Intern

Seattle, WA

- Built an AI-powered tool that generates LUA diagnostic scripts for known bugs, reducing script creation time by 40% and lowering operational costs.
- Curated a clean bug database by filtering deprecated versions and designed structured prompt templates for F5-GPT.
- Achieved 80% accuracy match between generated LUA heuristic files and expected diagnostic outcomes.
- Built a full stack web app using React and Flask for engineers to search bugs and download generated scripts.
- Technologies: LUA, Python, Flask, React.js, F5 GPT-4o, Git, Postman, Pandas, Openpyxl, Requests, Axios.

Seattle World School

October 2023 – June 2025

Learning Facilitator

Seattle, WA

- Assisted Grade 9–12 students in Math, Physics, Chemistry, Astronomy, and Computer Science during class sessions
- Partnered with teachers and Microsoft TEALS volunteers to enhance instruction and clarify assignments
- Skills: Communication, peer collaboration, initiative, student mentorship, visual explanation, adaptability

TECHNICAL SKILLS

Languages: Python, Java, C++, C#, JavaScript, SQL

Developer Tools: VS Code, Git, Android Studio, Azure DevOps

Technologies/Frameworks: React.js, Tailwind CSS, Unity, Docker, AWS(S3, EC2), Hive

PROJECTS

Fury – 2D Platform Game | Unity, C#, Physics, Animation

<https://kazkuz.itch.io/fury>

- Designed and developed a physics-based 2D platformer game with both single and local multiplayer support.
- Implemented enemy AI behavior, dynamic player animations, and collision mechanics using Unity's physics engine.

Automation Pipeline – AI-Powered Shorts | Python, Gemini AI, YouTube API, yt-dlp, FFmpeg

- An end-to-end pipeline to download videos, analyze with Gemini AI for relevance, and generate YouTube Shorts.
- Used yt-dlp for video scraping, FFmpeg for video trimming, and YouTube API for automatic uploading.

NASA Space Apps Hackathon – CO₂ Heatmap | Python, Streamlit, Folium, GPT, Pandas, JavaScript

- Collaborated with a team of four to build a web app visualizing Seattle's CO₂ emissions using open environmental data.
- Designed interactive heatmaps to improve public engagement with climate data, including the integration of an AI chatbot.

Heartbeat Sensor – ESP32 + Gemini AI | ESP32, Arduino, React, Tailwind, Node.js, Express, REST, Gemini API

- Built a real-time BPM monitor with ESP32 and IR sensor, sending data to a React web app.
- Used Google Gemini API to estimate heart rate and respond to user queries via chat.

Seattle University Jones Idea Challenge – Mobile App UI for Dick's Drive-In | Figma, UI/UX, Prototyping

- Designed and presented a Figma prototype for mobile ordering, focusing on simplicity, unique features, and boosting customer engagement.
