EDUCATION

Seattle University

Bachelor of Science in Computer Science and Minor in Mathematics
Merit Scholarship: \$23,500 per annum

Graduated June 2025

Seattle, WA

RELEVANT COURSEWORK

- Machine Learning
- Object-Oriented
- Computer Organization
- Data Structures
- Mobile Development
- Computer Systems
- Databases
- Algorithms

EXPERIENCE

Bilimetrix USA LLC

July 2025 – August 2025

Software Engineer Intern

Seattle, WA

- Enhanced a diagnostic platform with real-time updates, automated workflows, and interactive visualizations, focusing on performance, reliability, and accessibility across clinics.
- Built reusable chart components to visualize patient trends and improve clinical decision-making.
- Skills: C#, Asp.Net, Html5, MySQL, Git, Chart.js, Agile, Scrum

F5

September 2024 – June 2025

Software Engineer Intern

Seattle, WA

- Developed an AI-assisted platform to automate LUA diagnostic script generation from curated bug datasets, reducing manual script creation time by 40% and achieving 80% alignment with manual heuristics.
- Designed modular GPT-4o prompts with validation simulating expert diagnostic logic ensuring high-fidelity outputs.
- Built full-stack pipeline with React + Flask featuring bug search, script generation, validation, and download capabilities.
- Curated and normalized bug datasets, creating reusable templates and optimizing workflows for reproducible generation.
- Collaborated using Git and Azure DevOps within Agile framework to integrate feedback and track development tasks.
- Skills: LUA, Python, Flask, React.js, GPT-4o, Pandas, Git, Azure DevOps, Agile, Scrum

Seattle World School

October 2023 – June 2025

Learning Facilitator

Seattle, WA

- Assisted Grade 9–12 students in Computer Science, Math, Physics, Chemistry, and Astronomy during class sessions.
- Partnered with teachers and Microsoft TEALS volunteers to enhance instruction and improve accessibility of assignments.
- Skills: Communication, peer collaboration, initiative, student mentorship, visual explanation, adaptability

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, JavaScript, C#, SQL, R, Kotlin

Frameworks: React.js, Flask, Tailwind CSS, GSAP, Chart.js, Pandas, Scikit-learn, Spark, Unity

Tools: Git, Docker, AWS (S3, EC2), MongoDB, Azure DevOps, VS Code, Android Studio

PROJECTS

Portfolio Website | React, Vite, Tailwind CSS, GSAP

<https://mirza-kazim-husain.netlify.app/>

- Designed and developed a fully responsive React/Tailwind portfolio website with smooth GSAP animations, optimized performance, and accessibility best practices.

Fury - 2D Platform Game | Unity, C#, Physics, Animation

<https://kazkuz.itch.io/fury>

- Developed a physics-based 2D platformer game with single and local multiplayer support.
- Implemented enemy AI behavior, dynamic player animations, and collision mechanics using Unity's physics engine.

NASA Space Apps Hackathon – CO₂ Heatmap | Python, Streamlit, Folium, GPT, Pandas, JavaScript

- Collaborated with a team of four to build a web app visualizing Seattle's CO₂ emissions using open environmental data.
- Designed interactive heatmaps with structured data publishing and chatbot integration to improve public engagement.

Automation Pipeline– AI-Powered Shorts | Python, Gemini AI, YouTube API, yt-dlp, FFmpeg

- An end-to-end pipeline to download videos, analyze with Gemini AI for relevance, and generate YouTube Shorts..
- Used yt-dlp for video retrieval, FFmpeg for video trimming, and YouTube API for automated publishing.

Heartbeat Sensor – ESP32 + Gemini AI | ESP32, Arduino, React, Tailwind, Node.js, Express, REST, Gemini API

- Built a real-time BPM monitor with ESP32 and IR sensor, streaming data to a React web app.
- Integrated Google Gemini API to estimate heart rate and provide interactive responses through chat.
